Combined Data Analysis Report

MHT-CET Marks-Based Statistical Analysis

Report Generation Date: 01 June 2026

Dataset: Attempt 1 (April 2025) & Attempt 2 (May 2025)

Total Students Analyzed: 16,834

Total Shifts Analyzed: 27

Source: CETLens

Analysis generated using data available through CETLens (<https://cet-lens.vercel.app>). This report is based solely on the CETLens dataset and does not represent official MHT-CET statistics.

Table of Contents

PART I — Attempt 1 Analysis

- 1. Dataset Overview — Attempt 1
- 2. Shift-Wise Analysis — Attempt 1
- 3. Difficulty Ranking — Attempt 1
- 4. High & Low Score Analysis — Attempt 1
- 5. Marks Distribution — Attempt 1
- 6. Visualizations — Attempt 1
- 7. Interesting Insights — Attempt 1
- 8. Attempt 1 Conclusion

PART II — Attempt 2 Analysis

- 9. Dataset Overview — Attempt 2
- 10. Shift-Wise Analysis — Attempt 2
- 11. Difficulty Ranking — Attempt 2
- 12. High & Low Score Analysis — Attempt 2
- 13. Marks Distribution — Attempt 2
- 14. Visualizations — Attempt 2
- 15. Interesting Insights — Attempt 2
- 16. Attempt 2 Conclusion

PART III — Cross-Attempt Comparison

- 17. Attempt 1 vs Attempt 2 Comparison

PART IV — Combined Dataset & Report Closure

- 18. Combined Dataset Overview
- 19. Report Metadata
- 20. Conclusion
- 21. Disclaimer

Executive Summary

This report presents a marks-based statistical analysis of MHT-CET data from CETLens, covering **27 shifts** and **16,834 student records** across two examination attempts. Each attempt is analyzed independently, followed by a cross-attempt comparison.

Metric	Attempt 1	Attempt 2
Total Students	8,284	8,550
Total Shifts	16	11
Highest Marks	186	185
Lowest Marks	27	24
Average Marks	88.42	87.3
Median Marks	81.0	81.0
Std Deviation	31.7	29.94

Key Observations:

- Attempt 1 average (88.42) is higher than Attempt 2 (87.3) by 1.12 marks.
- Attempt 1 has 16 shifts with 8,284 students; Attempt 2 has 11 shifts with 8,550 students.
- Score variability is higher in Attempt 1 ($\sigma=31.7$) than Attempt 2 ($\sigma=29.94$).
- 18.3% scored above 120 in Attempt 1 vs 16.6% in Attempt 2.

Attempt 1 Analysis

8,284 students across 16 shifts

1. Dataset Overview — Attempt 1

Metric	Value
Total Students	8,284
Highest Marks	186
Lowest Marks	27
Average Marks	88.42
Median Marks	81.0
Mode Marks	64
Standard Deviation	31.7
IQR	47.0
Q1 (25th pctl value)	63.0
Q3 (75th pctl value)	110.0
Skewness	0.668

3. Difficulty Ranking — Attempt 1

Rankings below compare ONLY the 16 shifts within Attempt 1. No shifts from the other attempt are included.

Version 1: Average + Median Method

Methodology: $\text{Score} = (\text{Avg}/\text{MaxAvg} + \text{Median}/\text{MaxMedian}) / 2 \times 100$. Lower score = harder shift.

Hardest → Easiest

Rank	Shift	Avg	Median	Score
1	11 April - Evening	82.86	74.0	86.52
2	20 April - Morning	84.89	73.0	87.04

6. Visualizations — Attempt 1

Student Count by Shift — Attempt 1

Highest Marks by Shift — Attempt 1

Lowest Marks by Shift — Attempt 1

Standard Deviation by Shift — Attempt 1

7. Interesting Insights — Attempt 1

- **Outlier Shift:** 11 April - Morning average (93.02) is significantly above the Attempt 1 mean (88.10).
- **Outlier Shift:** 11 April - Evening average (82.86) is significantly below the Attempt 1 mean (88.10).
- **Outlier Shift:** 15 April - Evening average (93.16) is significantly above the Attempt 1 mean (88.10).
- **Unusual Distribution:** 20 April - Morning is strongly right-skewed (more low scorers) (skewness=0.866).
- **Unusual Distribution:** 11 April - Evening is strongly right-skewed (more low scorers) (skewness=0.834).
- **Methodology Disagreement:** V1 says 11 April - Evening is hardest, V2 says 20 April - Morning.

8. Attempt 1 Conclusion

Attempt 1 covered 16 shifts with 8,284 total student records. The overall average was **88.42** with a median of **81.0**.

Score variability ($\sigma=31.7$) and IQR (47.0) indicate moderate spread across students.

The hardest shift by V1 is **11 April - Evening** (score 86.52); by V2 is **20 April - Morning** (score 63.04). The easiest by V1 is **11 April - Morning** (99.92); by V2 is **11 April - Morning** (84.93).

18.3% scored above 120 marks, while 48.0% scored below 80.

Attempt 2 Analysis

8,550 students across 11 shifts

9. Dataset Overview — Attempt 2

Metric	Value

11. Difficulty Ranking — Attempt 2

Rankings below compare ONLY the 11 shifts within Attempt 2. No shifts from the other attempt are included.

Version 1: Average + Median Method

Methodology: $\text{Score} = (\text{Avg}/\text{MaxAvg} + \text{Median}/\text{MaxMedian}) / 2 \times 100$. Lower score = harder shift.

Hardest → Easiest

Rank	Shift	Avg	Median	Score
1	20 May - Morning	84.19	79.0	93.32
2	15 May - Evening	86.24	79.0	94.45
3	13 May - Evening	86.25	80.0	95.05
4	12 May - Morning	85.7	81.0	95.33

15. Interesting Insights — Attempt 2

- **Outlier Shift:** 13 May - Morning average (90.39) is significantly above the Attempt 2 mean (87.27).
- **Outlier Shift:** 20 May - Morning average (84.19) is significantly below the Attempt 2 mean (87.27).
- **Unusual Distribution:** 20 May - Morning is strongly right-skewed (more low scorers) (skewness=0.852).
- **Methodology Agreement:** Both V1 and V2 agree 20 May - Morning is the hardest shift.

16. Attempt 2 Conclusion

Attempt 2 covered 11 shifts with 8,550 total student records. The overall average was **87.3** with a median of **81.0**.

Score variability ($\sigma=29.94$) and IQR (45.0) indicate moderate spread across students.

The hardest shift by V1 is **20 May - Morning** (score 93.32); by V2 is **20 May - Morning** (score 68.02). The easiest by V1 is **13 May - Morning** (100.0); by V2 is **13 May - Morning** (82.1).

16.6% scored above 120 marks, while 48.1% scored below 80.

Key Comparison Highlights

- **Average:** Attempt 1 (88.42) vs Attempt 2 (87.3). Difference: 1.12 marks.
- **Median:** Attempt 1 (81.0) vs Attempt 2 (81.0).
- **Score Range:** Attempt 1 (159) vs Attempt 2 (161).
- **High Scorers (>120):** 18.3% (A1) vs 16.6% (A2).
- **Low Scorers (<80):** 48.0% (A1) vs 48.1% (A2).
- **Variability:** $\sigma=31.7$ (A1) vs $\sigma=29.94$ (A2). Attempt 1 has wider spread.
- **Distribution Shape:** Skew=0.668 (A1) vs 0.64 (A2). Both show similar skew patterns.

Combined Dataset & Report Closure

18. Combined Dataset Overview

This section presents summary statistics for the combined dataset (Attempt 1 + Attempt 2). No difficulty rankings are generated from the combined dataset.

Metric	Value
Total Students	16,834
Highest Marks	186
Lowest Marks	24
Average Marks	87.85
Median Marks	81.0
Mode Marks	64
Standard Deviation	30.82
IQR	46.0
Skewness	0.659
Kurtosis	-0.366

19. Report Metadata

Property	Value
Report Generation Date	01 June 2026
Total Files Analyzed	8
Total Records	16,834
Total Shifts	27
Attempt 1 Shifts / Students	16 / 8,284
Attempt 2 Shifts / Students	11 / 8,550
Coverage	Attempt 1 (April 2025), Attempt 2 (May 2025)
Stream	PCM
Source	CETLens (https://cet-lens.vercel.app)
Analysis Type	Marks-based statistical analysis

20. Conclusion

This report analyzed 16,834 student records across 27 shifts spanning two CET attempts.

Attempt 1 (April 2025) had 8,284 students across 16 shifts with an average of 88.42 and median 81.0.

Attempt 2 (May 2025) had 8,550 students across 11 shifts with an average of 87.3 and median 81.0.

The 1.12-mark difference in averages suggests Attempt 1 was relatively easier or the student cohorts differed in preparation.

Difficulty rankings were generated independently for each attempt using two methodologies. The multi-factor method provides more nuanced rankings by incorporating score distribution thresholds.

The combined dataset median (81.0) and average (87.85) reflect the overall examination landscape captured by CETLens.

21. Disclaimer

This report is generated using data available through CETLens (<https://cet-lens.vercel.app>). The analysis is based solely on the dataset available to CETLens and should not be interpreted as official MHT-CET statistics, results, rankings, or percentile information.

- This is NOT official MHT-CET data.
- No percentile analysis has been performed. No ranks or percentiles have been estimated.
- Focus is exclusively on marks-based statistical analysis.
- Difficulty rankings are generated separately per attempt and do not mix shifts across attempts.
- Student counts reflect CETLens dataset submissions, not the full examination population.
- This report should not be used for official admissions decisions.
